Juan José Diaz

Full stack developer

Buenos aires, Argentina
(+54) 011 2660-6410

juanjosediazarmada@gmail.com *Linkedin*-*Github*

As a Full Stack Developer, I have experience working on client projects, playing a dual role. I have specialized in implementing solutions using Firebase for database management and authentication. My expertise in JavaScript (JS), TypeScript (TS), and React has been key to developing high-performance web applications.

I have worked directly with clients to understand their needs and translate them into effective technical solutions. My ability to contribute both in coding and in team organization has been crucial to the success of our projects. My achievements include effectively overseeing project progress and actively collaborating with my colleagues to meet our goals. These experiences have allowed me to develop strong problem-solving skills and effective communication. English level B2 (Intermediate).

Programming Languages: TypeScript, JavaScript
Framework Tools: React, Next.js, Redux Toolkit, Tailwind, Express, React Native
Databases: Firestore, PostgreSQL
Tools: Git, Jira, Slack, GitHub
Agile: Scrum

Professional Experience

Full Stack Developer (Paid Internship)
GPEsportsRD – Dominican Republic   Feb 2024 - Present

In my role at GPEsportsRD, I work on developing various tools for managing and organizing Formula 1 tournaments using a tech stack that includes Node.js, React, Socket.io, and Electron. My main responsibilities include:

- Developing bots for Discord and WhatsApp using Node.js and the Discord/WhatsApp APIs.
- Implementing real-time data handling for Formula 1 with Socket.io.
- Creating desktop applications for managing OBS (Open Broadcaster Software) using Electron and React.

In this role, I collaborate with the team as a Full Stack Developer, continuously adapting to new technologies to meet project demands and perform my tasks effectively.

Full Stack Developer (Paid Internships)

Alma Cannabica - Buenos Aires, Argentina.   Dec 2023 – Jan 2024

At Alma Cannabica, my role involved the design, development, and optimization of our digital platforms to create an exceptional user experience. My key responsibilities included:

- Design interfaces and front-end elements to ensure a rewarding and secure user experience.
- Develop landing pages, dashboards, and components using advanced technologies.
- Continuously maintain and optimize our website and interfaces to facilitate and secure the purchasing process.

My work at Alma Cannabica focused on creating technological solutions that make the online shopping experience easy, secure, and enjoyable.

Full Stack Developer (Paid Internships)

Sumak Kawsay - Colombia.   Jan 2024 – Feb 2024

In this company, I had the privilege of working as a Full Stack Developer and User Experience Designer. My role was crucial in creating an intuitive and easily accessible platform for purchasing cryptocurrency. My main responsibilities included:

- Designed and conceptualized the website to provide an intuitive and pleasant user experience, with a responsive design that ensured accessibility across various devices.
- Programmed the website using advanced technologies such as Next.js, Rainbowkit, and Tailwind CSS, ensuring optimal performance and smooth navigation.
- Collaborated closely with the team to develop a cohesive vision aligned with the company's goals, reflecting the concept of a new era of community-driven wealth.
- At Sumak Kawsay, I had the opportunity to make significant contributions to the project of creating a cryptocurrency that empowers its users, enabling them to shape the future of the financial ecosystem in an inclusive and collaborative manner.
